The refitted interior

Warm light falls between the timber ceiling slats and over the solid oak worktops. The pale horizontal wall panelling continues from the kitchen into the rear lounge.

The U-shaped lounge, adjustable Lagun table and kitchen in the current interior.

Sliding-door entrance and fitted kitchen.

Oak-topped cabinetry beside the door.

View forward from the lounge with the screen lowered.

Two ways to make a double

The upper double lowers electrically. Below it, a fold-out section stored inside the U-shaped lounge turns the seats into a second double.

The Lippert Project 2000 double can be raised with its bedding in place.

The lower bed with the lounge cushions in position.

The same lower bed fully made up.

Pleated blinds give privacy at night.

Windows on both sides and at the rear.

Cooking, washing and film nights

A twin-ring Thetford induction hob, 90-litre fridge with freezer compartment and a Belfast sink make up the kitchen. Pull out the worktop below the fridge for extra prep space.

The 1080p projector viewed from the lounge table.

The view from bed.

Water on board

A 10-litre Pundmann heater supplies hot water. The underslung fresh and waste tanks have level sensors, with a standard Hozelock-type connector for refilling and UV treatment in the fresh-water system.

Shower and warmth

Indoors there's a custom stainless-steel shower tray, recessed shelf, separate extractor and Trelino Evo M waterless toilet. The outdoor shower supplies hot and cold water for rinsing off after a walk.

Heating & ventilation

Eberspächer diesel heating supplies warm air through the living space. The MaxxFan Deluxe roof fan has a rain cover and fitted night shade.

Beyond the electric hook-up

A Victron lithium battery bank, roof-mounted solar panels and alternator charging supply the leisure system. At a campsite, plug into a 230V hook-up.

400Ah
Lithium battery capacity

560W
Rated roof solar

3000VA
MultiPlus inverter/charger

The solar panels and awning seen from above.

Coddiwomple connected to a campsite supply.

System monitoring

The Cerbo GX and GX Touch 50 display show battery and charging information. A Lynx battery management system and fused distributors handle the DC supply.

Internet on the road

A roof-mounted Starlink Mini has a dedicated DC supply and switch. There's a separate 5G Wi-Fi unit on board.

Cameras & security

Two Blink cameras, blind-spot coverage and front and rear dash cameras are fitted. The Scorpion S5+ tracker comes with ScorpionTrack app access and an immobiliser.

Room outside

Wind out the 4.2-metre Fiamma F80s awning for shade beside the sliding door. Open both rear doors and there's a shelf to sit on, with a storage compartment behind it.

Raptor alloy wheels, BFGoodrich tyres and the awning with its legs down.

Rear-door windows and exterior light.

The pitch beside the sliding door.

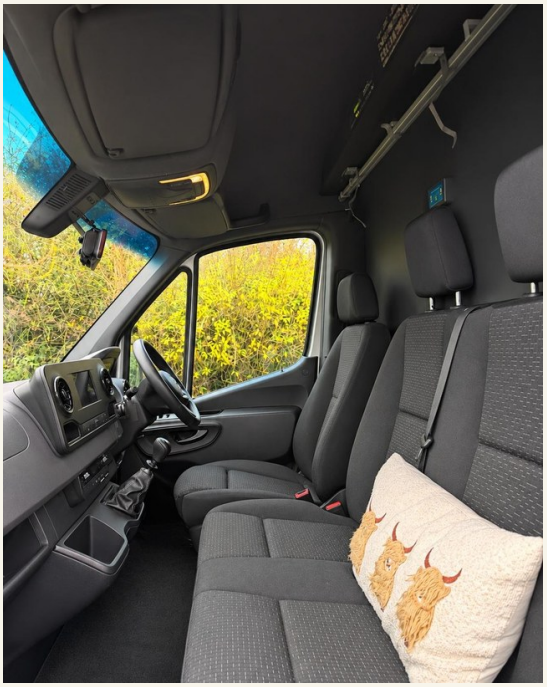

A sheltered spot among the trees.

The long-wheelbase Sprinter from above.

Come and see Coddiwomple

This 2022 Sprinter 315 CDI has covered 78,459 miles. All three belted travel seats are up front, with a single driver's seat and a double passenger bench.

The right-hand-drive cab.

Coddiwomple on three different outings.
